They are only being furnished to you and may not be photocopied, reproduced or distributed to any other persons at any time without the prior written consent of the Group. This Presentation has been prepared by the Group based on information and data which the Group considers reliable, but the Group makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of or any omission from this Presentation is expressly excluded.
-  Certain matters discussed in this Presentation may contain statements regarding the _____ market opportunity and business prospects that are individually and collectively forward-looking statements. Such forward-looking statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and assumptions that are difficult to predict. The _____ actual results, levels of activity, performance or achievements could differ materially and adversely from results expressed in or implied by this Presentation, including, amongst others: whether the Group can successfully penetrate new markets and the degree to which the Group gains traction in these new markets; the sustainability of recent growth rates; the anticipation of the growth of certain market segments; the positioning of the products and services in those segments; the competitive environment; and general market conditions. The Group assumes no obligation to update any forward-looking information contained in this Presentation. Any forward-looking statements and projections made by third parties included in this Presentation are not adopted by the Group and the Group is not responsible for such third-party statements and projections.

Contents

Corporate Overview

Corporate Profile

We focus on vertical integration for monocrystalline products, providing one-stop solutions from ingots, wafers, cells, modules and the development, design, construction, operation and maintenance of PV System

Cross-listed in Hong Kong (00757.HK) and Taiwan (9157.TT)

Shareholding Structure as at 30 June 2015

Product Range

Ingot

800MW in Jinzhou + 400MW in Xining (put into production successively) = Total 1.2GW

Wafer

900MW

Cell

300MW

Module

600MW

System

Established

Market and Operation Highlights

Despite favourable market policies and the recovery of photovoltaic industry in the Chinese market, the supporting measures has not yet been rolled out. As a result, combining with the typical seasonal fluctuations, the pace of growth in the overall industry in the first half of 2015 slowed down a little and the overall market demand for solar products eased slightly. Further, with continuous technological improvement in the production process, the overall Average sustainable prices.

During the period under review, the market is still dominated by multi-crystalline silicon products, which resulted in the less-than-expected demand for monocrystalline silicon products in the market. However, with the continuing realisation of advantages in better potential improvement in conversion efficiency, lower and stabler decay rate in its photovoltaic systems, continued reduction in unit costs, etc, it is expected that the market share of monocrystalline silicon products will increase significantly in the next couple of years.

While maintaining the highest product quality, as a result of technological improvement in the production process, production has become more efficient. The Group was hence able to improve its Gross Profit Margin and also capture a higher overall Gross Profit and EBITDA.

Financial Performance

Through successful implementation of cost control measures, the Group has turned around its performance and recorded net profit for the period.

Key Financial Ratios

As at 30 June	1H2015	1H2014	Change
Turnover Day Analysis			
Trade Receivables Turnover (Days)	44	39	5
Trade Payable Turnover (Days)	123	60	63
Inventory Turnover (Days)	124	52	72
Gearing Analysis			
Current Ratio (Times)	0.79	0.71	0.08
Net Debt to Equity Ratio (%)	124.6%	122.8%	(1.8PP)

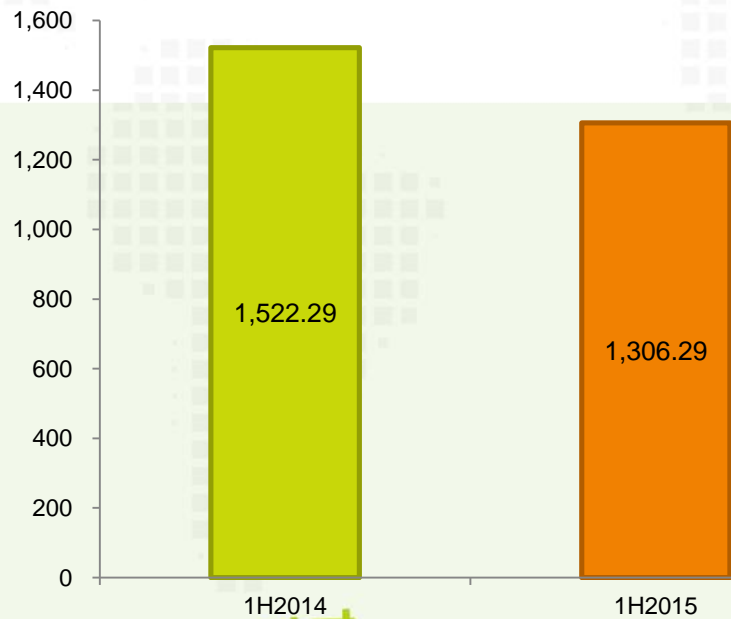

Revenue and Shipment Volume

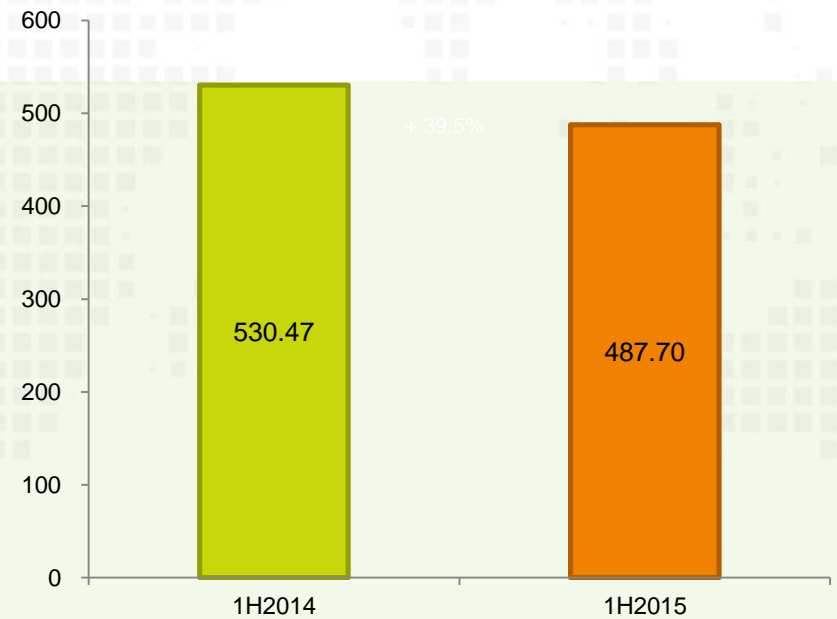

As mentioned above, overall pace of growth in installation of the industry has slowed slightly in the first half of 2015.

recorded a turnover of RMB1,306.291 million, compared with RMB1,522.285 million for the corresponding period last year. External shipment volume amounted to 487MW during the year.

Revenue (RMB million)

Shipment Volume (MW)

Gross Profit and Gross Profit Margin

- As mentioned above, while maintaining the highest product quality, as a result of technological improvement in the production process, production has become more efficient. The Group was hence able to improve its Gross Profit Margin and also capture a higher overall Gross Profit. Gross Profit increased by RMB23.104

Gross Profit (RMB'000)

Business Review

Cell Business

- The manufacturing base of the Group in Jinzhou is equipped with production lines of solar cells having a production capacity of 300MW, which mainly provides cells for the production of the downstream modules.
- During the period under review, the internally-utilised volume of solar cells increased to 66% of the total shipment volume of solar cells.

Module Business

- Continuing strong co-operations with its key customers, including Chinese state-owned enterprise, Japanese conglomerate and new and existing customers with stable

Photovoltaic Power Plant Projects

 The Group fully utilized the advantages of its vertical integration, actively expanding the business of end market, which increased the demand of the products from downstream to upstream.

 The 20MW large-scale photovoltaic power plants project in Golmud, Qinghai Province is in operation, and generates an average of approximately 33 million kWh electricity per year. The project enjoys the photovoltaic power generation feed-in tariff policy of RMB 1

Future Plans and Strategies

- 
-  Global leading vertically integrated solar power play with exclusive strengths to provide better services for applications, development and one-stop solutions

Action Plans in 2015

Policy Guidance

A major document on the photovoltaic industry named *Opinions on Further Optimizing the Market Conditions for Mergers and Restructuring for the Photovoltaic Industry* (the *Opinions*) issued by the Ministry of Industry and Information Technology of China in late 2014 pointed to the strengthened financial support for photovoltaic enterprises for their expedited structural optimization, transformation and upgrade through mergers and acquisitions, and to the formation of some core enterprises in the industry with strong international competitiveness by the end of 2017. In accordance with national policy, the Group will consolidate its industry leading position through the following action plans. .

Action Plans

- Adhering to vertical integration strategy, the Group will focus on the development of monocrystalline products by fully leveraging its technological advantage in monocrystalline products
- Leveraging monocrystalline vertical integration strategy to integrate the *monocrystalline* production capacity with a view to improving the gross profit of the *monocrystalline* module products and driving the profit growth
- Apart from maintaining a stable cooperation with its customers in Japan, the Group will also take an active role in expanding its cooperation with Mainland and Taiwan customers
- The Group will actively expand its downstream business of constructing, operating and maintaining photovoltaic power plants with a view to promoting the development of power plants projects in emerging markets including Africa, Southeast Asia, Turkey, Pakistan and other Balkan countries
